PROFESSIONAL SUMMARY

Full-stack web developer and designer with hands-on experience building responsive, production-ready websites using React.js and modern JavaScript, and 4+ years of professional experience in operations and client-facing delivery. Skilled at integrating AI tools — Claude, ChatGPT, and Gemini — into the development workflow for code generation, code review, debugging, documentation, and rapid prototyping. Combines technical execution with strong organizational, stakeholder, and problem-solving skills.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript, React.js, HTML5, CSS3, Responsive Web Design

Databases: MongoDB

Developer Tools: Git, GitHub, Vercel, GitHub Pages, VS Code, npm

AI-Assisted Development: Claude, ChatGPT, Gemini — applied for code generation & review, debugging, technical research, prompt engineering, documentation, and image/asset generation

Design: Logo design, brand identity, UI/UX fundamentals

Productivity & Collaboration: ClickUp, Trello, HubSpot, Google Workspace, Notion

SELECTED PROJECTS

KidzaEnt Marketplace — Full-Stack Web App (In Progress) — github.com/zaiky09/KidzaEnt

- Building a full-stack marketplace web application for Kidza Enterprise Ltd, where users can browse and purchase goods and services from a catalogue.
- Building an AI-powered recommendation feature using the Gemini API that takes a natural-language input (e.g. a dish or recipe a user feels like eating) and returns the required ingredients available in the marketplace, turning a craving into a purchasable cart.
- Implementing trip tracking using the browser Geolocation API, with planned migration to the Google Maps API for richer mapping, routing, and place data.
- Stack: JavaScript across the stack with MongoDB for data persistence; building backend API and marketplace frontend in parallel, using AI-assisted development (Claude, ChatGPT, Gemini) for code generation and debugging.

PetFinder — React Web App — pet-finder-one.vercel.app

- Built a responsive pet discovery web application with React and modern JavaScript, deployed on Vercel with continuous deployment from GitHub.
- Used AI-assisted development to accelerate component scaffolding, debug rendering issues, and iterate on UI improvements.

Beyond Border Merchants — Business Website — beyond-border-merchants.vercel.app

- Designed and developed a client-facing merchant business site, including logo and brand identity, and deployed via Vercel.
- Delivered an end-to-end solution from brand identity through to live production site.

By Graces — React Web App — by-graces.vercel.app

- Built and shipped a responsive web application with React, focused on clean UI and mobile-first layout, deployed on Vercel.

Magical Continent Ltd — Production Business Website — magicalcontinent.com

- Designed and developed a production business website live on a custom domain, along with the company's logo and brand identity.

Personal Portfolio — Hosted on GitHub Pages — zaiky09.github.io/Zamil-Portfolio

- Built and deployed a personal portfolio site showcasing web projects and logo design work for clients including Tubonge Podcast, Kidza Enterprise, Oui Limitless, LSG, and Thirst Trap.

PROFESSIONAL EXPERIENCE

Executive Assistant to the CEO | Cyberhaven — AI & Data Security

Apr 2026 – Present

- Provide direct executive support to Nishant Doshi, CEO of Cyberhaven, an AI and data security company, managing a dynamic calendar across multiple time zones and coordinating end-to-end travel logistics.
- Conduct targeted research to inform executive decisions and meeting preparation, leveraging AI tools (Claude, ChatGPT, Gemini) to accelerate synthesis and produce concise briefings.
- Manage executive-facing communication on the CEO's behalf, drafting and prioritizing correspondence with internal teams, investors, partners, and external stakeholders.

Executive Assistant / Operations Lead | Zaresa Ltd

Oct 2023 – Dec 2025

- Supported senior leadership of a fast-paced, multi-stream SME by managing daily inbox and calendar workflows, improving response time, schedule accuracy, and meeting preparedness by 28%.
- Implemented task and priority tracking systems using ClickUp and Trello, reducing missed deadlines and follow-up gaps by 15%.
- Streamlined supplier coordination and inventory planning, reducing delivery disruptions by 18%.
- Applied HubSpot-style CRM workflows to strengthen stakeholder follow-through, increasing successful order completion by 20%.
- Leveraged AI tools (Claude, ChatGPT, Gemini) for research, document drafting, and process optimization, increasing overall operational efficiency by 20%.

Customer Experience Executive | Acorn Holdings Africa

Mar 2021 – Dec 2021

- Delivered high-volume customer support (~60 daily calls), generating 30+ monthly sales and improving conversion rates by 10%.
- Coordinated cross-functional teams to improve service delivery, increasing response speed and productivity by 20%.
- Drove revenue recovery through proactive follow-ups, increasing rent collection from 80% to 95%.
- Collaborated with the IT team to resolve account issues, cutting resolution time by 30% and improving customer trust metrics by 18%.

EDUCATION

Software Engineering (Full-Stack) Certificate

2023

Moringa School

BSc. Biochemistry & Molecular Biology

Dec 2025

Jomo Kenyatta University of Agriculture & Technology (JKUAT)
